

*The mission of the Navarre Beach Marine Science Station is to promote the appreciation, conservation, and understanding of the marine ecosystem of coastal Florida through education and service.*

## A quick introduction

The Navarre Beach Marine Science Station is a newly established marine station located at the Navarre Beach Park in Santa Rosa County, Florida. The station is home to passionate students and highly qualified educators who both study and teach about Florida's amazing Gulf-coast ecosystems. They can't wait to meet you!

## Saturdays-by-the-Sea

What better way to spend a Saturday than with a bunch of people who are as excited about the ocean as you are? Join us for hands-on themed activities for select Saturdays beginning in the spring! Check out the schedule online for more details.

## Sleepover-by-the-Sea

Who says sleeping with the fishes is a bad thing? Spend the night learning about the amazing animals in the deep sea, checking out the dunes after dark, and stay up to find out if fish really do sleep! Limit 20 students per event.

## Hands-in-the-Sand Saturdays

Want to learn more about the Marine Science Station, and have fun with your family while doing just that? Come check us out on Saturdays and learn first-hand what goes on here, as we teach by the beach! You can also sign-up for any remaining spots in sleepovers, camp, and Saturday programs.

## SUMMER CAMP!

Two unique weeks to choose from for fun in the sun, and learning by the sea!

## Sign me up!

Space is limited, so please sign up early! You will need to complete the following (all forms available online):

- Registration form
- Waiver
- Payment
