

SUPPORT THE NAVARR BEACH MARINE SCIENCE STATION

2011 Gulf Guardian Award Winner for excellence in environmental education

Since its official opening in August 2009, the Station has been host to well over 4,000 students and community members for programs concerning the local marine environments. The programs provide hands-on, feet-wet curriculum that educates and challenges participants from ages 3-33+ on how to be stewards of our marine environment. New programs have expanded to now include college classes offered to area high school students (through Pensacola State College and Santa Rosa County School District), field experiences for K-8 school children, Saturday programs for K-8 students, over-night programs for 3-8th graders, public open houses for visitors to Navarre Beach, summer camps, and programs geared for both pre-K students and their family and for students with special needs. Our newest annual fundraising event will be the Science Spooktacular by the Sea featuring area teachers and students. All of the programs are designed to leave participants with a new found understanding and respect for their nearby marine ecosystems, as well a desire to protect and conserve the delicate habitats of Florida.

Please check out www.navarresciencestation.org to find out more about us!

Your business logo can be included on all promotional products such as banners, summer camp t-shirts, flyers, and on the website as a community supporter of this exciting project.
